

4/10/2023

And just like that, another week of construction is in the books! This week was filled with work on multiple areas; it was really great to see action happening all over.

### Exterior Dining and Entrance Site Work

The top of the car port was removed and now work has begun on the pillars. This means that we can start to look at re-opening the Tower One front entrance on or about 4/24/2023.

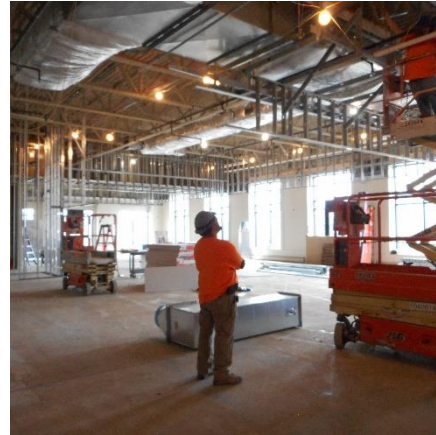

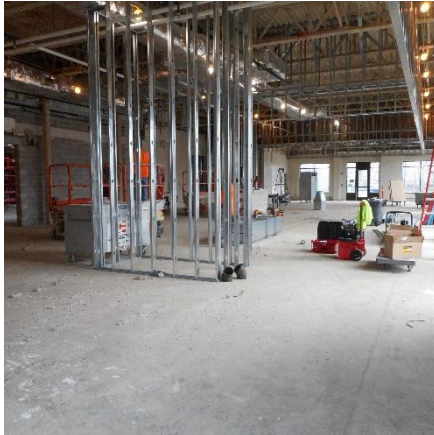

Our amazing resident welcome ambassadors are looking forward to welcoming visitors to our community once more through our beautiful new entrance.

If you take a look at the picture to the right, you can start to get a sense of the two story glass Solarium and the space it's going to give our residents for soaking up sun, as well as for programming and visiting with friends and family.

### Dining Space/Display Kitchen

Inside, you can really start to get a sense of the elevation changes in ceiling height and the position of the fireplace in the Dining Space. The change in ceiling height will give us a much better acoustical experience while we dine and the fireplace will be a lovely added feature during the winter months.

Work has also begun with the HVAC systems; part of this renovation will be to look at how the system heats and cools the space and allow the system to regulate temperatures throughout the ground floor more evenly. We've retained Colliers as our commissioning partner and they will oversee the balancing and efficiency of the system, with the goal of a consistent temperature in all spaces.

### **Upcoming Work**

This week the goal is to continue to remove the pillars for the carport and fill in all the gravel for the floor for the solarium and exterior dining space. Inside the focus will be removing that final cinderblock wall where the meat portion of the Display Kitchen will be.

Seeing the footprint of the Solarium and the framing in the Dining Room helps us start to really imagine what our spaces will look like.
