

6/9/2023

Things are in full swing with our renovation and these past several days have been really exciting; you can really start to see the project coming together. The spaces are coming alive!

Exterior Dining and Entrance Site Work

As you enter our campus and look left, you can get a sense of how the new Tower One entrance, solarium space will look.

A more open, spacious and light filled entrance awaits you where you and guests will be warmly welcomed.

It will be a gift to our residents to sunbathe a bit in the winter months in front of those giant windows!

We'll get those Tower One benches back outside, as we've been asked for those to return. We know that our residents enjoy sitting outside especially when the weather is nice. We are working diligently to re-install benches.

Dining Space/Display Kitchen

In the actual heart of the Display Kitchen, between the wiring, plumbing and general construction much of the internal structure is coming together and starting to show the layout more clearly. Starting to shape up!

Programming for Residents – A Highlight

It's been a goal of our entire team to do our best to soften the disruptions and enhance the socialization during this time.

Dean Tinari, our Healthy Living Coordinator and Sarah Moskowitz, our Volunteer Coordinator have been delivering extra programming and volunteer led events to keep residents engaged throughout construction. A special thanks to Barry and Hyla

Vine who have supported Theatre trips open to our entire community.
