# CONSTRUCTION UPDATES

10/26/2023

We are excited to share some construction and renovation progress with everyone.

## Exterior Dining and Entrance Site Work

Our solarium and our new entrance is closer to being finished in glass. Once installed, the glass will really complete the look and give our community an amazing window to enjoy sunlight through.

Work is going to commence on the actual roofing and then work can begin on our new entrance doors. Our new welcome desk, centrally located to between both buildings, will feature a lovely concierge style and approach. We look forward to welcoming you!

We understand that securing our community is important and we are taking every measure into consideration, both through construction and through training for our team. We'll enjoy more light filled spaces and open spaces, but we'll also ensure that these new spaces include safety features as well.

## Dining Space/Display Kitchen

Inside the dining spaces, you can start to see the beautiful new finishes, which is very exciting. As you walk through the space, you can see ceiling tiles being installed, sprinkler heads being finished in the acoustic tiles, paint on walls, wallpaper being applied and other touches that really start to show off how amazing the finished space will be.

Pictured here, not in its full glory, is our focal point of the dairy kitchen....our pizza oven!

We can't wait to show this installed with the beautiful mosaic tile behind it; hoping to share that in our next construction update. I can smell the pizza already!

## Upcoming Work

As this memo is being written, the kitchen equipment is being unloaded; induction burners, hot wells, cold wells, Panini press, refrigerators and grab and go cooler are all being staged to be installed inside of the next two working weeks.

As soon as this kitchen work is completed, we will be installing a hearing loop which will help our community hear better in our spaces and enable our residents and community members to better enjoy programming.

We are so grateful to the funders, public and private donors, who have helped make this ground floor project a reality. We have great appreciation to all who are providing financial support for this incredible transformation.

We'd like to take a moment to share some additional gratitude as well; we've gotten such wonderful feedback about how many of our residents and their families read these newsletters and are following this project. We can't wait to open this space and bring the food closer to our community.

Jesse Wescott
