

12/22/2023

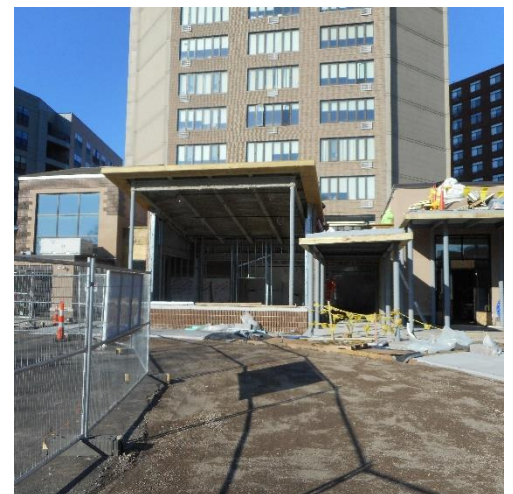

As we close 2023, we wanted to share one last update before some members of our team enjoy a few days off to charge their batteries for the coming year. 2024 will be an exciting year, during which, our community will start to use and enjoy our new amazing spaces.

### Exterior Dining and Entrance Site Work

Work continues in these areas and the Solarium is being readied for the installation of the metal framework and glass. Pictured below are stacks of the metal grids that will hold the glass.

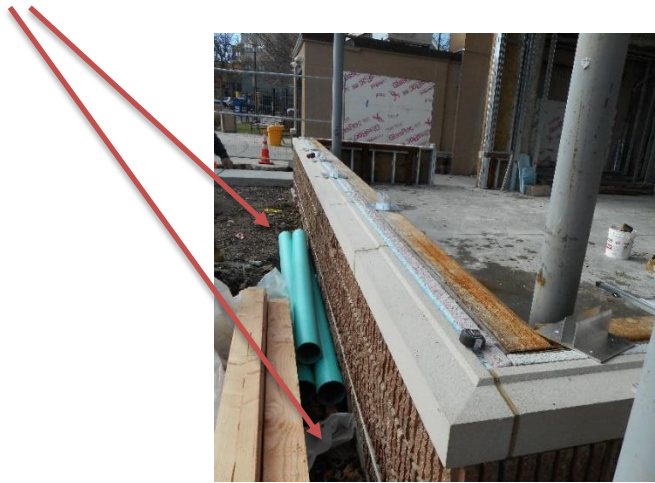

You can also start to see in the other picture how the sidewalk and parking area will lead us into the Tower One entrance. There is also work continuing on the exterior roof areas, that will allow the masonry trades to finish our fascia work and really complete the first impression of our building.

The finished edges of the Solarium's lower wall have been completed as well and if you can picture where the teal PVC tubes are, you'll get a sense of where a river rock and architectural boulder garden will be. There will be more modern bollards also lighting our path in this area.

## Dining Space/Display Kitchen

Inside the Dining Room and Kitchen lots of detail work is happening; this doesn't have the wow factor of some of the other updates we shared, but we'll all be happy when the lights work and the HVAC systems have better control of the room's temperature.

In our next update, we'll show progress from the millwork carpentry that is slated to start in the upcoming week. We'll also talk a little bit about the lighting package that will bring a modern feel to the space while painting it with brightness.

## Well Wishes

As we bid farewell to 2023, we wanted to take a moment and wish our community well. It's been a transformative year here at The Towers with a very bright 2024 on the horizon. Enjoy this peaceful time and cheers to you all!

Jesse Wescott

Vice President – The Towers at Tower Lane
